## TECHNICAL PROJECTS

---

### MUSIC PLAYER APP

March - April 2022

- It utilizes **MongoDB**, a popular NoSQL database, for efficient database management. The app's front is built using **React.js**, a powerful JavaScript library for building dynamic user interfaces, and **Node.js**, a scalable and efficient server-side JavaScript environment, powers its backend.
- My app provides users with a seamless and engaging music playback experience that is responsive and fast. The app also uses **RESTful APIs** to facilitate communication between the front and backend, ensuring robust functionality and reliability.

### STUDENT MANAGEMENT SYSTEM

Sept - Oct 2021

- Developed a command-line interface application in **C** programming language that manages student records using a **linked list** data structure, resulting in an efficient and organized system.
- Utilized data structure concepts such as linked lists to optimize the storage and retrieval of student information.
- Implemented with the **file management system** that provides a comprehensive and user-friendly experience.
